

WE ARE PLEASED TO ANNOUNCE YOU OUR NEW PARTNERSHIP WITH COMSOF.

Comsof is the world leader in creating intelligent network planning and design software. With more than 20 years of experience in GIS-based optimization, Comsof's team of world-class engineers has deployed its solutions in over 50 countries.

Their flagship is Comsof Fiber, which has been used to design fiber networks covering more than 100 million homes. Their newest addition is Comfort Heat, planning and design software for district heating and cooling networks.

Mr. Panagiotis Vouvounas, CEO of Vector Technologies, welcomes Comsof Company in Vector family:

"We are delighted to announce our new cooperation with Comsof. We believe that this cooperation will expand our product portfolio and services which we are offering to Telecom providers, NEMs and System Integrators. Given the vast technological evolution of 5G and FTTx, we trust that Comsof solutions will be a valuable asset towards those challenges."
